DETAILED ACTION

1. **Claims 1-38** have been examined.
2. Priority benefit claimed under Title 35, United States Code, § 120 have been acknowledged.

Specification

3. The disclosure is objected to because of the following informalities: updating.
Please update "the cross reference to related applications" information.
Appropriate correction is requested.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2132

5. **Claims 1-4** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent Numbers. 6,820,202 B1; and US 6,820,199 B2 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because :

Claim(s) 1-4 of patent # 6,820,202 B1; and 6,820,199 B2 respectively contain(s) every element of claim(s) **1-4** of the instant application and as such anticipate(s) claim(s) **1-4** of the instant application.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is anticipated by a patent claim to a species within that genus). " **ELI LILLY AND COMPANY v BARR LABORATORIES, INC.**, United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

7. **Claims 1-38** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-4, the "decrypting the digital signature" phrases makes the claims indefinite and unclear in that neither means/method steps nor interrelationship of means/method steps are set forth in these claims in order to achieve the desired results expressed in the "decrypting digital signature" phrases.

It is not clear when an encryption of the digital signature has taken place in order to have a decryption process conducted.

8. **Claims 5-38** are rejected based on their dependency on the rejected independent claims 1-4.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
